METALLIC FINISHES

DEBEER METALLIC ULTRA FINE BRIGHT

DEBEER
REFINISH

SHINE NEW LIGHT ON YOUR METALLIC REPAIRS

Achieve challenging 'mirror look' finishes with ease with our new addition to the WaterBase 900+ Series. DeBeer Refinish Metallic Ultra Fine Bright toner is the simple solution to delivering perfect repairs on metallic finishes.

Containing very fine, specially shaped aluminium particles, it enables you to achieve the precise match to delight your customers – bright, deep colours with a silky, shimmery effect.

Results above the rest

When you choose DeBeer Refinish Metallic Ultra Fine Bright, you are choosing the DeBeer technology and innovation you know you can rely on.

Offering perfect rub resistance plus excellent intercoat adhesion and suitability for tinting, the metallic pigments in this toner are superior to all other metallic pigments, with top quality:

- Brilliance
- Hiding power
- Flop effect
- Non-leaving behaviour

Reliable simplicity

As you would expect, DeBeer Metallic Ultra Fine Bright is fast and easy to apply with a standard application process, for most colours, helping you achieve the refinish workflow you need to maximise profitability.

Perfect for spot repairs

The toner is just as suitable for larger-scale refinishing as it is for use on spot repairs or repairing minor damage, including alloy wheel rims. Simply use with our other WaterBase 900+ Series systems to achieve an optimal finish.

Suitable for most automotive brands

To keep things simple, this toner is suitable for use on a wide range of makes and models. You can find the precise formula for a particular model in the ICRIS Colour Retrieval System.

For existing customers, please update your ICRIS software to the latest version to access the right formula.

How to order

DeBeer Refinish Metallic Ultra Fine Bright is available as part of the WaterBase 900+ Series. Here is the product information you will need when ordering.
